OBJECTIVE

Full-Stack Developer | MERN Stack Developer skilled in designing and delivering scalable, high-performance web applications. Expert in MongoDB, Express.js, React.js, and Node.js, with strong proficiency in system architecture, API design, and performance optimization. Adept at building secure, production-ready RESTful services, creating responsive and intuitive user interfaces, and integrating robust backend systems. Committed to clean code, maintainable architecture, and delivering reliable, business-driven digital solutions.

EDUCATION

BS COMPUTER SCIENCE
June 2023 - Now

SUPERIOR UNIVERSITY

ICS
August ,2021 - May, 2023

PUNJAB GROUP OF COLLEGE

MATRIC
November,2019 - June,2021

GOVT CENTRAL MODEL SCHOOL LOWER MALL LAHORE

WORK EXPERIENCE

MERN Web Developer - *Self-InitiatedProjects* *2019 - Now*

Library Management Dashboard

- Developed a full-featured library management system using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Designed a responsive and user-friendly admin dashboard with React for efficient library operations.
- Implemented secure RESTful APIs to manage books, users, and transactions.
- Integrated real-time data updates for seamless library management.
- Optimized database queries and backend logic to ensure high performance and scalability.
- Implemented authentication and role-based access control for secure admin operations.
- Applied clean code practices and modular architecture for maintainability and scalability.

Real Time Snake Multiplayer

- Built a real-time multiplayer Snake game using React, TypeScript, Node.js, Express, and Socket.IO for seamless live gameplay.
- Implemented a room system allowing players to create/join matches and compete against up to 10 users with synchronized game state.
- Developed responsive game UI with React, Tailwind CSS, and Framer Motion for smooth animations and intuitive controls.
- Integrated real-time networking logic for movement, food spawning, collision detection, and scoring using Socket.IO.
- Enhanced gameplay mechanics including speed boosts, respawn features, and customizable snake skins.

File Management System (Store It)

- Developed a file management app using Next.js and Appwrite.
- Implemented user auth and secure file storage with preview support.
- Integrated secure user authentication and authorization using Appwrite to protect user data and restrict access.
- Architected modular frontend and backend interactions for maintainability and scalability.
- Utilized hooks and utility functions to optimize performance and improve code reuse

AI Chat Application

- Developed an AI-powered chat application using React and Tailwind CSS for dynamic, interactive conversations.
- Integrated Gemini API to provide real-time, context-aware AI responses.
- Designed a clean, responsive UI with intuitive message flows for seamless user interaction.
- Implemented asynchronous API handling and state management for smooth, low-latency performance.
- Applied modular, reusable component architecture for maintainable and scalable code.

3D Space System

- Built an interactive 3D space simulation using React Three Fiber and Three.js.
- Created immersive planets, stars, and space environments with smooth animations.
- Implemented responsive controls for exploring the 3D space in a fun, engaging way.

SKILLS

Frontend:

HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Tailwind CSS, Responsive UI Design

Backend:

Express.js, Python, RESTful API Development, Authentication & Authorization , Server-Side Rendering

Databases:

MongoDB, SQL, Microsoft SQL Server (MS SQL), Database Design, Query Optimization

DevOps & Tools::

Git, Docker, Deployment, API Integration, Environment Configuration

Programming Languages:

JavaScript, Python, C++

TRAINING & CERTIFICATIONS

Introduction to Front End Development
Udemy /2022

Introduction to SQL
SoloLearn /2025

LANGUAGES

English
Fluent

Urdu
Fluent

PERSONAL INTERESTS

- Exploring emerging web technologies and modern frameworks to stay ahead of industry trends.
- Building side projects and contributing to open-source initiatives.
- Participating in coding challenges and hackathons to sharpen problem-solving skills.
- Focusing on UI/UX design principles and continuous interface performance optimization.

CAREER HIGHLIGHT

- Architected and delivered scalable, production-ready full-stack applications using the MERN stack, ensuring performance, security, and long-term maintainability.
- Developed and optimized secure RESTful APIs and backend services, improving system reliability and data efficiency.
- Built responsive, high-quality user interfaces with React.js, Next.js, and Tailwind CSS, focusing on usability, accessibility, and performance optimization.
- Collaborated across teams, contributing to code quality, best practices, and efficient development workflows using Git and Docker.
